Aurora, Ohio 44202-6802

FOR IMMEDIATE RELEASE

## **Upcoming Aurora Hydrant Flushing**

**June 1, 2020 through June 19, 2020**

The City of Aurora Water Department will be flushing the waterlines for the Cleveland water area only (generally north of Lena Drive and west of the industrial area) beginning Monday, June 1, 2020 through Friday, June 19, 2020. The Portage area (generally the southeast section of the city), will be scheduled later.

The purpose of this flushing is to improve carrying capacity and water quality, which will remove settled substances, and discolored or stale water.

Flushing will take place between the hours of 8:00 a.m. and 4:00 p.m. Customers may experience intermittent pressure fluctuations and a temporary condition of discolored water. If discoloration occurs, customers should **NOT** allow their water to run. This will not clear discoloration. The iron in the water main needs time to settle. Water clarity will return. Do **NOT** wash whites if water is discolored. Discolored water will dissipate within 1 or 2 days but is safe for bathing, drinking and food preparation.

Should you have any special concerns, please feel free to call the Water Department at (330) 995-9109 or email at [utilitydepartment@auroraoh.com](mailto:utilitydepartment@auroraoh.com).
