

SWP3 Requirements

An SWP3 plan shall be created and shall include the completed checklist as published by Ohio EPA. The checklist shall be signed, sealed, and dated by the Engineer of Record with the following statement: "I have reviewed the SWP3 plan and it is in compliance with all current Ohio EPA criteria." The SWP3 plan may be submitted as part of the plans or as a separate document.

A copy of the current NPDES permit, as requested by the checklist, is not required in the SWP3 plan. Including this link http://www.epa.ohio.gov/dsw/storm/const_SWP3_check.aspx in the document will replace the requirement of a full printed copy.

All necessary construction details and notes for the SWP3 shall also be included in the plans.

The final SWP3 shall be submitted electronically prior to the preconstruction meeting.
