

## **CITY OF AURORA NATURAL GAS ENDORSEMENT PROGRAM**

We are announcing a fixed rate for natural gas for residents wishing to join the City's new natural gas endorsement program. Residents will enjoy a fixed rate of \$6.81 per Mcf for all gas consumed through their Dominion East Ohio Gas May, 2010 billing period. IGS Energy is the City's endorsed supplier.

We are pleased to offer this program to our residents as another option in their attempts to manage increasing energy costs. The \$6.81/Mcf rate is the lowest rate of any similar community-program in the area. We've been watching the wholesale natural gas market very closely and have seen unprecedented volatility in prices over the past 12 months. We are pleased that we were able to lock-in such a low rate for the upcoming months and next winter. This low fixed rate will allow participants to plan and budget in these trying economic times. However, this program makes no guarantee of savings and it is completely voluntary. Eligible residents should expect to receive a notice in the mail from IGS Energy in the first week of May. The notice will explain the rate, terms and conditions, and various means of enrolling in the City's natural gas program. IGS Energy recommends that residents look for this letter and follow its simple instructions to enroll by phone, mail or through the IGS Energy website.

Any resident or small business that is currently served by another supplier or Dominion East Ohio may join the City's program by calling IGS Energy at 1-800-280-4474. Current IGS Energy customers served under prior contracts will be expected to honor those terms and conditions and will not receive a mailer. If you are served by another supplier you should be aware of the obligations in your existing contract before joining the Aurora program, as many suppliers charge a penalty for early termination.
