

CITY OF AURORA SEPTIC SYSTEM CLEANING PROGRAM

PROGRAM DESCRIPTION:

The City of Aurora maintains an on-going septic tank cleaning program. This is completed on a rotating schedule (once every other year) for those homeowners who have completed an Application for Septic System Cleaning. Supeck Septic Services has been contracted by the City to perform this service at no cost to the resident.

WHO IS ELIGIBLE:

All residents of Aurora with septic systems who have completed an Application for Septic System Cleaning.

COST:

There is no cost to the resident. Because a portion of your real estate taxes are used to operate and maintain the City's wastewater treatment plants, the City will assume the cost of emptying your septic tank(s).

PROCEDURE:

Complete and return the enclosed application. Your authorizing signature is required. It is very important that you put the tank location information on this form and include a business telephone number if you work. Once the completed application is received by the City, we will fax it to Supeck Septic Services and they will call you to schedule your cleaning. Their telephone number is 330-467-5377. The resident must make each individual septic tank "cleanout" accessible for service. If these are located underground, the homeowner is responsible for excavation of this area. The City recommends that the owner be present to review and monitor the cleaning.

QUESTIONS:

General questions may be directed to the City at 330-995-9116.
